real

This custom one-level home offers a visually striking great-room concept with soaring vaulted ceilings, exposed beams, and architectural curves that create an impressive sense of space. The flowing floor plan includes three bedrooms, a den/office, and a handy mudroom off the attached two-car garage. All rooms have been freshly painted, and are generously sized with tall ceilings, adding to the home's open and airy feel. The kitchen features abundant cabinetry, stainless steel appliances, a garden/bay window, and space for an everyday dining table, with a large formal dining room adjacent—ideal for gatherings, helpers in the kitchen, and effortless entertaining. The luxurious primary suite includes a beautifully tiled walk-in shower with spa-style features such as dual shower heads, a rainfall option, and glass-block accents. This home sits on a flat, sunny shy half-acre lot within the Rolling Hills community, offering access to a clubhouse, swimming pool, dock, and beach.
